

CWM AUTOMATION
machinery design, build & maintenance

**FILLING, SEALING & LIDDING
MACHINES FOR PRE-FORMED
CONTAINERS, BOTTLES & JARS**

Increase your efficiency and profitability with CWM Automation ancillary equipment, designed to compliment the CWM range of bespoke packaging, filling and heat sealing machines

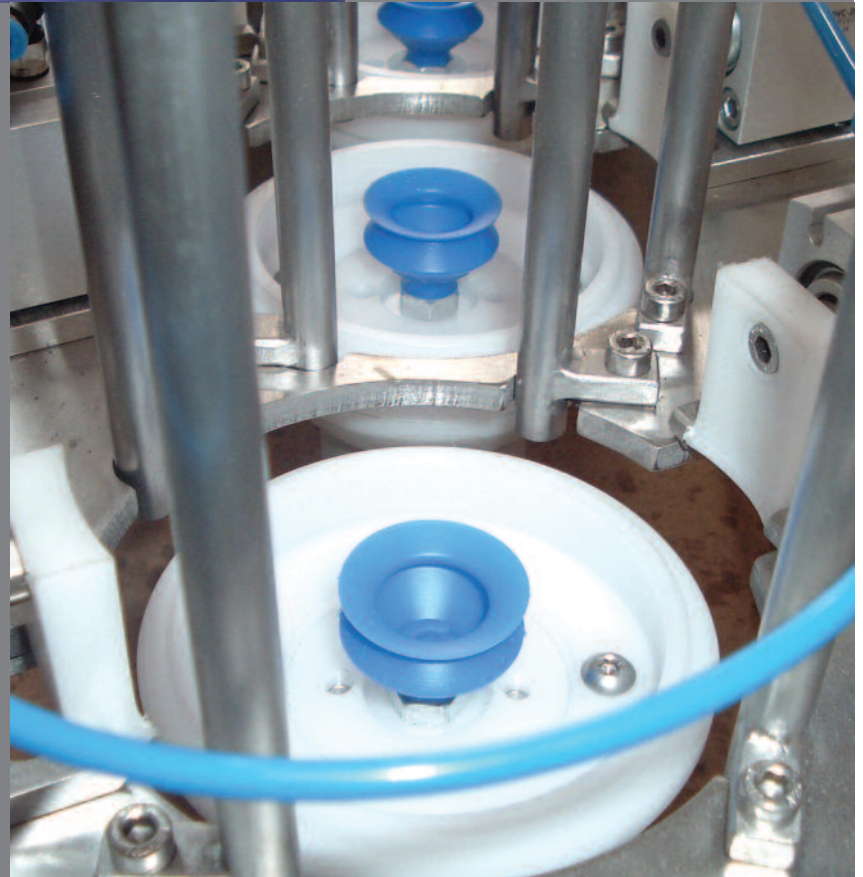

ANCILLARY EQUIPMENT

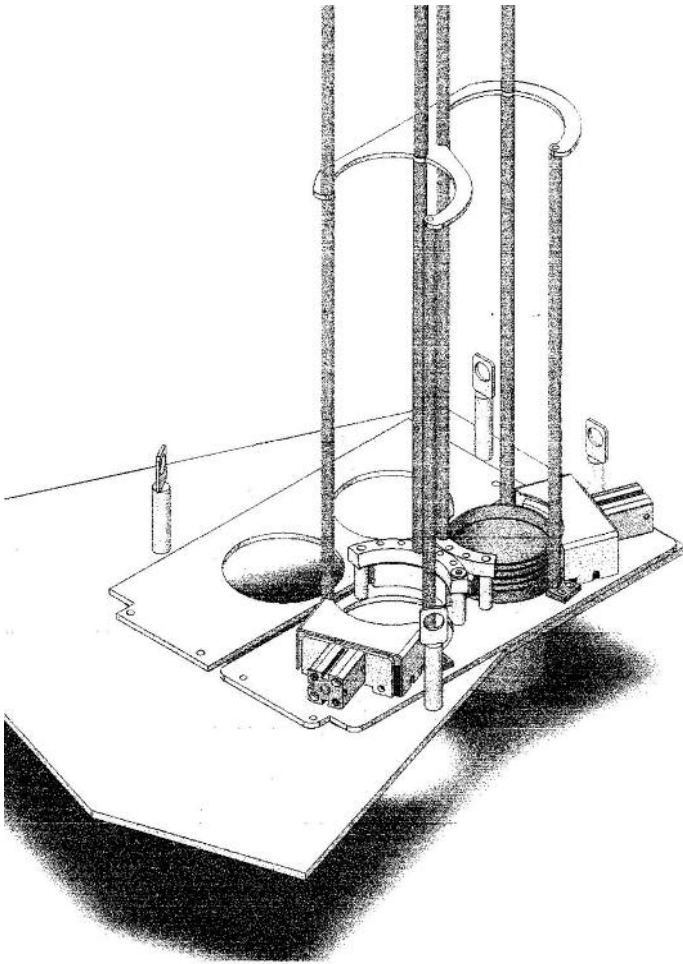

In addition to CWM Automation's highly flexible rotary and linear container filling, heat sealing and lidding machines, CWM offers a wide range of ANCILLARY EQUIPMENT. Manufactured in stainless steel, CWM'S ANCILLARY EQUIPMENT is designed and built to suit its customers exact requirements, enabling them to maximise production and profitability. Open construction and easy access ensures CWM equipment is hygienic and operator-friendly.

Ancillary Equipment Types
