

BUCKET FILLING & LIDDING LINES

Increase your efficiency and profitability with CWM Automation bespoke bucket filling, sealing and lidding machines.

CWM Automation offers a range of highly flexible inline bucket filling, heat sealing and lidding lines. Manufactured in stainless steel, each bucket line is meticulously designed and built to suit our customers exact requirements. Our bucket lines can handle buckets from 1kg to 10kg and incorporate very fast changeovers between different sizes, utilising servo driven chain adjustment and height adjustment with single point side guide rail adjustment. Open construction and easy access make our bucket filling lines operator-friendly.

Machine Types
